Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. Changes in market conditions and government policies may lead to periods of heightened volatility in the bond market and reduced liquidity for certain bonds held by the fund. In general, when interest rates rise, bond values fall and investors may lose principal value. Interest rate changes and their impact on the fund and its share price can be sudden and unpredictable. Some funds, including nondiversified funds and funds investing in foreign investments, high-yield bonds, small- and mid-cap stocks, and/or more volatile segments of the economy, entail additional risk and may not be appropriate for all investors. Consult a fund's prospectus for additional information on these and other risks. A portion of a municipal fund's income may be subject to federal, state, and/or local income taxes or the alternative minimum tax. Any capital gains distributions may be taxable. The U.S. government guarantee applies to certain underlying securities and not to shares of the Adjustable Rate Government Fund or Short Duration Government Fund. *Carefully consider a fund's investment objectives, risks, charges, and expenses before investing. For a current prospectus and, if available, a summary prospectus, containing this and other information, call your investment professional or visit wellsfargofunds.com. Read it carefully before investing.*
